This division applies the occupational & environmental safety criteria and performs training programs to the employees to acquire necessary skills in the field of environment, health and occupational health.

Because we aware that the safety & occupational health are the key environment elements of the right work which can affect the productivity, quality and stability in the work area, we provide the financial and technical facilities to contribute in maintaining the workers spirit, make them feel relaxed in order to increase individual productivity and achieve the top level quality.

Our awareness towards the environmental issue is the fact that we are targeting the public health via international & local environmental legislations application; therefore, the company has established a division for looking after the environmental management in the factory.
